1. Introduction

Purpose:

This document constitutes an acknowledgement of contract (AOC) between prospective institutions (public colleges and university educational institutions) to establish a contract(s) for the acquisition of Student Internship Information Technology Services for various agencies throughout the State of Missouri in accordance with the requirements and provisions stated herein.

Institution's Contacts:

Institutions and their agents (including sub-contractors, employees, consultants, or anyone else acting on their behalf) must direct all of their questions or comments regarding the AOC, to the contact indicated on the first page of this AOC.

Background:

The State of Missouri desires to establish agreements with the state-supported colleges and universities for the purpose of expanding an existing student intern program.

The state's student intern program is intended to benefit the state as well as the student interns. The state benefits by being able to have access to and review as many IT candidates as possible from as many colleges and universities as possible. Participating interns gain training opportunities in which valuable working experience and knowledge is gained. It is anticipated that, after graduation, longer term employment opportunities may arise out of successful internships.

The State of Missouri requires Computer Information Specialists, or students pursuing other computer-related disciplines, to be knowledgeable and fully trained in the technology available at colleges offering computer-related associate and/or bachelor degrees.

As long as the student is enrolled and paying tuition to the college or university, the student is qualified to be hired as an intern with the State of Missouri.

The information technology operations of the state are conducted in multiple platform environments, including but not limited to the following:

- a. Mainframe
- b. AS/400
- c. UNIX
- d. PC
- e. Web and Web 2.0
- f. Client/Server

The state utilizes multiple software development languages, databases and networks including but not limited to the following:

<i>Development Languages</i>	<i>Databases</i>	<i>Networks</i>
COBOL	Oracle	Cisco
C++ and C#	SQL	
Focus	DB2	
Java		
Microsoft Access	.NET	
Lotus Notes	Advantage Gen	
Visual Basic	Websphere	
Web development tools		

As a guideline, intern salaries will be approximately \$10.50 per hour. However, interns' actual salaries shall be negotiated between the respective hiring state agency and the student.

The respective college/university shall be paid a one-time, monthly or annual administrative fee based on percentage (established herein) of the intern's salary plus a monthly Intern Coordinator Fee per intern, if applicable.

For informational purposes only, previous agreements have added administrative fees of 8% of the intern's salary and Intern Coordinator fees ranging from 4% of the intern's salary to \$75 per intern. Student interns will not be treated as employees by the state agency.

Multiple awards will be made as a result of this AOC in order to meet the demand for intern services. However, the state reserves the right to not award if the fees quoted by the college/university are not cost effective or are not comparable to other college/universities fee structure.

State agencies, may opt to utilize the subsequent contract(s) or to establish their own intern agreements. Upon award of the subsequent contract(s), the state does not guarantee usage by its agencies.
